GANESH BARI

AWS Cloud Engineer | DevOps | Infrastructure as Code

ganeshbari244@gmail.com | +91 8770067324 | LinkedIn | GitHub | Burhanpur, Madhya Pradesh

PROFESSIONAL SUMMARY

AWS-certified Cloud Engineer with hands-on experience in cloud infrastructure, automation, and application support. Proficient in designing and deploying scalable, highly available architectures on AWS using Terraform, Docker, and CI/CD pipelines. Proven ability to reduce manual effort through scripting and workflow automation, with a strong foundation in Linux, networking, and DevOps practices.

TECHNICAL SKILLS

- **Cloud Platform:** AWS (EC2, S3, RDS, IAM, VPC, Route 53, Cloud Front, ALB, Auto Scaling)
- **Infrastructure as Code:** Terraform
- **Operating Systems:** Linux (Ubuntu), Windows Server
- **Networking:** TCP/IP, DNS, NAT, Subnetting, Security Groups, NACLs
- **Monitoring & Logging:** Amazon Cloud Watch, System Logs
- **Scripting & Automation:** Bash, Shell Scripting
- **DevOps Tools:** Git, Docker, CI/CD

PROFESSIONAL EXPERIENCE

Software Engineer | BA Continuum India Pvt. Ltd., Chennai *Nov 2021 – Nov 2022*

- Supported Fulfilment & Servicing Technology (FAST L3) applications with 24/7 uptime responsibility, ensuring high availability across production systems.
- Automated request classification and data extraction workflows using Work Fusion and scripting, reducing manual effort by 50%.
- Performed incident management, root cause analysis (RCA), and troubleshooting in collaboration with cross-functional teams.
- Documented process improvements that enhanced team efficiency and reduced frequency of recurring incidents.
- Monitored daily application health and configured alerting workflows to proactively detect and resolve issues.

CERTIFICATIONS

AWS Certified Cloud Practitioner — Amazon Web Services View Credential

AWS re/Start Graduate — Amazon Web Services View Credential

Agile with Atlassian Jira — Coursera View Credential

EDUCATION

Diploma in Advanced Computing (DAC) *May 2021 – Sep 2021*

Centre for Development of Advanced Computing (C-DAC), Hyderabad

Bachelor of Engineering – Computer Science *2016 – 2020*

Rajiv Gandhi Proudyogiki Vishwavidyalaya (RGPV), Bhopal

PROJECTS

Three-Tier Architecture Deployment on AWS

- Deployed a scalable three-tier web architecture (web, application, and database layers) on AWS for high availability.
- Configured VPC with public and private subnets, NAT Gateway, and route tables to enforce secure, segmented networking.
- Implemented ALB and Auto Scaling Groups to distribute traffic and maintain fault tolerance under variable load.
- Set up RDS Multi-AZ deployment with automated backups and encryption at rest for data resilience and compliance.
- Enforced principle of least privilege using IAM roles, security groups, and NACLs across all tiers.
- Monitored system health and performance using Cloud Watch metrics, alarms, and dashboards.

Tech Stack: *VPC, EC2, RDS, ALB, Auto Scaling, IAM, Cloud Watch*

FAST – Fulfilment and Servicing Technology (Bank of America)

- Developed automation applications for email classification and structured data extraction to reduce manual processing time.
- Created service requests in the downstream application Icon to facilitate processing of payments, advances, and rollovers.
- Automated daily monitoring and alerting workflows, reducing repetitive manual tasks and improving response time.

Tech Stack: *Work Fusion, Linux, Shell Scripting, Cloud Services*
